

period of 96 hours; and

(b) repeating said step (a) in 21 day cycles until remission of said patient's breast cancer is obtained.

REMARKS

Applicants extend their appreciation to Examiner Jerome Goldberg for his time and discussion during the personal interview held on March 1, 1995 with Dr. Wyndham Wilson and with applicants' representative, Mr. James C. Haight. As a result of this interview, applicants were requested to provide an amendment and response after final rejection in which arguments and declaratory information relating to the deficiencies of the cited "Gilman et al." reference would be presented for reconsideration by the Examiner.

In addition, as discussed at the personal interview, the specification has been amended to delete references to the treatment of lymphomas in connection with the presently claimed invention. Finally, new claim 15 is presented pursuant to the discussion with Examiner Goldberg during the interview. It is respectfully submitted that the foregoing has been effectuated, without prejudice, to expedite the prosecution of the instant application and is not to be construed as a disclaimer or waiver of the cancelled subject matter for presentation in a subsequently-filed patent application(s).

Accordingly, in this Amendment, applicants have cancelled claims 3, 4, and 7-14 and have added new claim 15 to fully and concisely describe their invention. It is respectfully submitted that no new matter has been added. Claim 15 is believed to be in condition for appeal and is presented for consideration and examination at this time.
